Forecast for Sunday 13 Nov 2022

Weather: Most routes will stay dry with good clear then brighter spells developing across the park. However cloud may thicken at times to bring some patchy light rain or drizzle, chiefly sporadically in and around far eastern and southern hills.

Chance of cloud-free hill tops above 800m: Generally 90% but 50% in far east and south.

Low Cloud and visibility: Good or very good, becoming moderate or poor in any light rain or drizzle, very poor within cloud with bases occasionally lowering 500 m across east and south, but otherwise infrequently so.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts reaching 50-60 mph during the morning across most exposed ridges and summits.

Forecast for Monday 14 Nov 2022

Weather: Cloudy start with patchy rain or drizzle soon feeding from the west during the morning, before clearing as well broken cloud follows from the west into and through the afternoon. Rain and hill fog returning from the west late evening.

Maximum wind: South to southeast initially mean 20 mph with gusts reaching 30 mph across most exposed ridges and summits, easing from mid-morning.

Chance of cloud-free hill tops above 800m: Soon becoming 10% or less during the morning, before improving 80% by late afternoon

Low Cloud and visibility: Good or very good, becoming moderate or poor in light rain or drizzle, very poor within cloud with bases becoming extensive from 500 m at first before lifting and breaking into the afternoon.

Temperature: **Valleys:** Plus 8 Celsius rising 15 Celsius during the afternoon
At 800m: Plus 5 Celsius
Freezing level: Above summits

Thursday	Overcast with showers or longer periods of rain and summit snow, again heavy at times with the risk of thunder. South to southwest winds occasionally strong. Freezing level at or just above highest summits.
